REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards an image processing method and apparatus. Each independent claim identifies the uniquely distinct feature “ wherein a binary threshold value calculation for calculating a binary threshold value, based on a histogram, with which a predetermined area in an input image is blurred, while a binarization for binarizing said input image using said binary threshold value and a calculation for calculating the color of said predetermined area of said input image based on the results obtained by said binarization”. The closest prior art, Matsui et al. (USPN 4,931,881), disclose for an image binarization system in which the threshold value used for the binarization process can be adjusted to thereby enable the process to be made more accurate and avoid loss of black areas in characters in the process of digitizing and conversion, wherein the threshold value is based on the average value of pixel density values around the pixels to be binarized; while Tanioka (USPN 4,723,173), discloses an image

processing apparatus comprising a first processor for binarizing an input image data with a first threshold level, a second processor for binarizing the input image data with a second threshold level, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
